- phpMyAdmin , Sqlite , PostgreSQL , MongoDB, MariaDB

Other

- Docker , Postman , Linux (Basic) , SourceTree, Github , GitLab, vercel, netlify, Tailwind css, Bootstrap

Language

- Thai
- English

Profile

I am a recent graduate with a Bachelor's degree in Information Technology, actively seeking a challenging position in software development. I bring strong expertise in back-end technologies, but I am also proficient in front-end development. I am flexible and capable of working on both ends of a project. With strong problem-solving skills and good logical thinking, along with a deep passion for continuous learning, I am eager to make significant contributions to a dynamic development team.

Work Experience

April 2023 - June 2023
Toyota Material Handling Warehouse Solution
Intern / Programmer

- Ticketing System Development (solo project)
- Web-Based API Documentation
- Server Room Inspection and Maintenance

Project

Sales System

Detail : E-commerce website for ordering and tracking vegetables and fruits, with features for order tracking, purchase history, and income monitoring for administrators.

- using NextJs v.14 and MongoDB as a Database

Soft Skill

Time Management

- I effectively prioritize tasks and allocate time to ensure deadlines are met

Resourcefulness

- I have a knack for finding solutions and making the most out of available resources

Problem Solving

- I excel at analyzing complex issues, breaking them down into manageable parts, and devising effective solutions.

Certificate

Feb 2024| The Asia Undergraduate Conference On Computing

Received an award for presenting a research article as a poster. Good level (GOOD)

Oct 2023 | Career for the Future Academy

Information Technology Professionals Examination (ITPE)
